## 01 Internship Introduction

Programme, duration and purpose

## 02 Organization & Domain

Siemens Data Science Master

## 03 Objectives & Scope

Skills and professional outcomes

## 04 Internship Structure

Week-wise learning modules

## 05 Learning & Activities

Assessments, assignments and practical exposure

## 06 Project / Technical Exposure

Data science workflow covered in the report

## 07 Outcomes & Conclusion

Skills gained and future scope

## 08 Certificates & Proof

Completion certificate and offer-letter evidence

## About the Internship

The internship was undertaken through the 8-Week AICTE–EduSkills Virtual Internship Program in the Siemens Data Science Master domain.

The programme combines structured learning with practical exposure, weekly assessments, project documentation/assignments and a final assessment.

## Duration

April 2026 – June 2026

## Format

Virtual / Online

## Domain

Data Science Master

## Credential

Virtual Internship Certificate

## Evaluation

Weekly assessments • Project submissions • Final Assessment Test

### Siemens Data Science Master

The internship domain focuses on industry-relevant data science and AI/ML capabilities. The offer letter identifies the domain as “Siemens Data Science Master” and describes a structured, week-wise learning plan.

### Key Areas Covered

- AI and machine learning applications & use cases
- Data engineering and data transformation
- Machine learning foundations and advanced techniques
- Data preparation and automation
- Model deployment and monitoring
- RapidMiner AI Hub platform administration

## Objectives

- Develop industry-relevant data science skills.
- Understand practical AI/ML workflows.
- Learn data access, transformation and preparation.
- Build foundational and advanced ML knowledge.
- Understand deployment, monitoring and platform administration.
- Improve employability through structured assessments and practical exposure.

## Scope

- End-to-end learning across data science stages.
- Exposure to both technical and application-oriented modules.
- Weekly assessments for progress tracking.
- Project documentation and assignments.
- Final assessment for overall programme evaluation.
- Development of a foundation for future data analytics / ML projects.

# 4. Week-wise Internship Structure

## Week 1 | Applications & Use Cases Professional

Identify business problems suitable for AI/ML.

## Week 2 | Data Engineering Professional

Access, load, transform and calculate data.

## Week 3 | Machine Learning Professional

Build foundational machine learning skills.

## Week 4 | Data Preparation Master

Advanced data handling and automation.

## Week 5 | Machine Learning Master

Learn advanced machine learning techniques.

## Week 6 | Applications & Use Cases Master

Deploy and monitor ML models.

## Week 7 | Platform Administration Master

Configure and manage RapidMiner AI Hub.

## Week 8 | Platform Administration Master

Enterprise-level platform operations.

# 5. Internship Activities & Evaluation

## Structured Learning

Completed the week-wise modules provided in the internship programme.

## Weekly Assessments

Progress and understanding were tracked through weekly assessments.

## Project Documentation

Certain modules required project documentation and assignments.

## Final Assessment

The final week included a Final Assessment Test.

## Overall Evaluation

Final grade considered weekly assessments, project submissions and final test.

## Data Handling

Data access, loading, transformation, calculation and preparation.

## Machine Learning

Foundational and advanced ML concepts and techniques.

## Model Lifecycle

Deployment and monitoring of machine learning models.

## AI/ML Applications

Mapping business problems to suitable AI/ML use cases.

## Platform Skills

RapidMiner AI Hub configuration and administration.

## Professional Skills

Assessment discipline, documentation, practical exposure and employability.

## Project Work

The report documents practical data-science work as part of the internship experience. The project section applies the learned workflow to a machine-learning problem.

## Data Preparation

- Data inspection
- Cleaning
- Encoding
- Scaling
- Train-test split

## Machine Learning

- Regression models
- Model training
- Evaluation metrics
- Model comparison

## Outcome

- Model evaluation
- Performance interpretation
- Best-model selection
- Technical documentation

**This slide is included only as a part of the internship report; the presentation is focused on the overall internship.**

# 8. Learning Outcomes

## Outcome 1

Understanding of an end-to-end data science workflow.

## Outcome 2

Improved knowledge of data engineering and data preparation.

## Outcome 3

Foundational and advanced machine learning exposure.

## Outcome 4

Understanding of model deployment and monitoring concepts.

## Outcome 5

Exposure to RapidMiner AI Hub administration.

## Outcome 6

Experience with structured assessments and technical documentation.

## Outcome 7

Greater confidence in applying data science concepts to practical problems.

## 9. Internship Completion Certificate

Evidence

# 10. Internship Offer Letter

Evidence

Ref No: C16Y2026M051398417

## Internship Offer Letter

**Student Name** : Pramod kumar  
**Stream** : B.Tech  
**Branch** : B.Tech(Computer Science and Engineering (Cyber Security))  
**Institute Name** : IILM University, Greater Noida  
**Internship Domain** : Siemens Data Science Master  
**Internship Duration** : April 2026 - June 2026  
**AICTE Student ID** : STU699acedf75b401771753183

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

### **Internship Structure & Evaluation:**

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official

### **The week wise Structure of the Internship is as Follows:**

| Week                                                            | Module                                | Description                                                               |
|-----------------------------------------------------------------|---------------------------------------|---------------------------------------------------------------------------|
| Week 1                                                          | Applications & Use Cases Professional | Learn to identify business problems suitable for AI and machine learning. |
| Week 2                                                          | Data Engineering Professional         | Learn to access, load, transform, and calculate data.                     |
| Week 3                                                          | Machine Learning Professional         | Build foundational machine learning skills.                               |
| Week 4                                                          | Data Preparation Master               | Master advanced data handling and automation.                             |
| Week 5                                                          | Machine Learning Master               | Learn advanced machine learning techniques.                               |
| Week 6                                                          | Applications & Use Cases Master       | Deploy and monitor ML models.                                             |
| Week 7                                                          | Platform Administration Master        | Configure and manage RapidMiner AI Hub.                                   |
| Week 8                                                          | Platform Administration Master        | Enterprise-level platform operations.                                     |
| Final Credential Validation / Internship Grade Point Assessment |                                       |                                                                           |

**Note: There is no stipend associated with this internship.**

We congratulate you on your selection and wish you a successful learning journey.

# 11. Professional Reflection

## What I Gained

- Better understanding of data science as an end-to-end process.
- Exposure to real-world AI/ML use cases.
- Stronger understanding of data preparation and machine learning.
- Awareness of model deployment and monitoring.
- Improved ability to learn through structured assessments and documentation.

## How It Supports My Career

The internship provides a foundation for future roles and projects in data analytics, data science and machine learning. The combination of technical modules, assessments and practical exposure helps connect academic learning with industry-oriented skills.

# 12. Conclusion & Future Scope

## Conclusion

The Siemens Data Science Master Virtual Internship provided a structured 8-week learning journey covering AI/ML applications, data engineering, machine learning, data preparation, deployment and platform administration. The programme strengthened technical understanding through assessments and practical documentation.

## Future Scope

- Continue advanced machine learning practice
- Build more end-to-end data science projects
- Explore model deployment and MLOps
- Strengthen data engineering and cloud skills
- Work with larger and real-world datasets
- Pursue industry-oriented certifications and internships

# THANK YOU
